1) OSE120P = 6 km/h with platform lifted above 500mm

2) Applies only to OSE120P. h₇ remains 138mm

3) Depending on battery compartment

- The new E-MAN steering concept is ideally suitable for picking as well as for pallet handling applications. Light, one hand operation increases the flexibility for the driver and the same time simplifies driving in the fork direction.
- For easy second level picking OSE120P with elevating platform, offers a design which optimizes the total picking cycle. Both efficiency and manoeuvrability increases as the operator always has the E-MAN handle within close reach.
- Dual-pallet handling, with fork lengths up to 2350 mm the OSE120 excels on the market of fork lifting order pickers.
- The performance of the OSE120 is first-rate. A travel speed of 12 km/h, together with high acceleration, increases the number of pick-ups. With our motor technology it is very easy to adjust top speed, acceleration and speed reduction to meet individual requirements.
- The BT POWERDRIVE system provides reliability and simplicity. CAN-bus technology means fewer parts and reliable transmission of data. A PIN code start up procedure offers higher operational safety by stopping unauthorised driving.
